

Nemschoff Announces the New 2750 Series
New line of lounge seats make the wait seem shorter

SHEBOYGAN, WI –January 1, 2004 – Nemschoff is pleased to introduce a new series of lounge and patient chairs to their innovative line of healthcare furnishings. The 2750 Series is a perfect complement to the popular 2700 Series, creating hundreds of possibilities for design configurations with something for any healthcare setting.

The lounge chair in the 2750 Series is designed for maximum seating in a minimum space. This comfortable chair can be ganged up to four seats.

The 2750 Series also includes a highback patient chair that is 40 ½ inches high and has a matching footstool.

All of the products in the 2750 Series—which are guaranteed by the Nemschoff Lifetime Warranty—are solid maple with black molded urethane armcaps and replaceable components. These lounge and patient chairs, with their spring seat construction, will make any time spent in a waiting room feel a lot shorter.

Nemschoff—founded in 1950—leads the country in quality furnishings for hospitals and other healthcare settings. Their new 2750 Series is another example of their dedication to building the highest quality, inventive furniture on the market.
